

Backend med Python & Django

Gruppe DELTA

Søren Raben, Laura Emilie Jacobsen, Peter Rud Frankild

The two factor authentication setup

Django – Implement (mfa)

Two-Factor Authentication

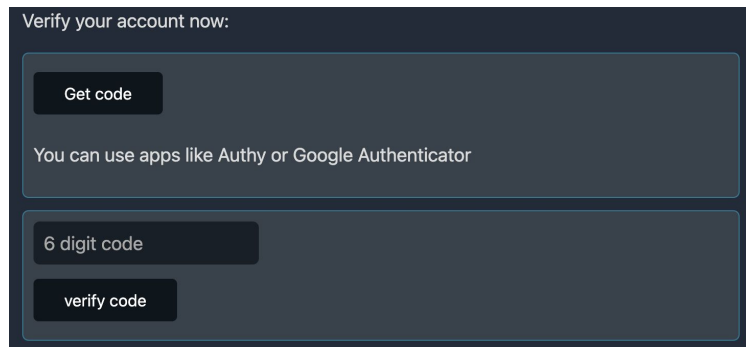

```
python manage.py startapp mfa_app
```

```
settings.py
```

```
serializers.py
```

```
PYOTP & Rest framework
```

```
Get code
```

Verify your account now:

Get code

You can use apps like Authy or Google Authenticator

6 digit code

verify code

The screenshot shows a dark-themed user interface for account verification. It features a title 'Verify your account now:', a 'Get code' button, a text instruction 'You can use apps like Authy or Google Authenticator', a '6 digit code' input field, and a 'verify code' button.
